

User Stories testing

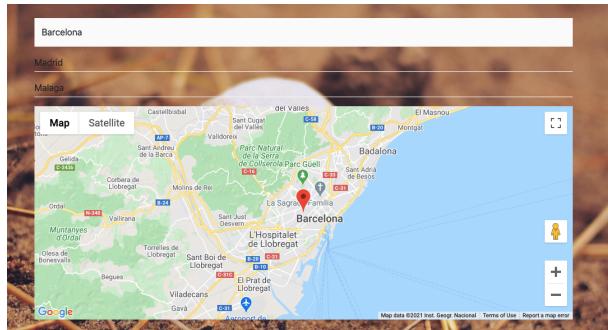

- As a user, I want to understand what is the project all about.
- I have decided to put image slideshow to show what is the project all about by seeing images and I believe its easy to understand.

- As a user, I should be able to navigate to the relevant pages and social links that will give me complex Information about the product.
- About us button, things to do and social links are added to give more Information about the product.

- As a user, I would be able to see the different locations of the farm through a map.
- I have decided to put a map and when every is being clicked, it will show in the map.

- As a user, I would like to see a responsive contact form to get in touch through email and inquire about the product.
- A responsive contact form using JS email is added.

- Most of the time I am on my mobile phone so as a user I want to research online using my mobile phone.
- Below are the screenshots in mobile view of every pages
